1. Review of 10/19/23 Notes
2. Reports:
3. Topics:

Erik

Radios: No changes

Everbridge Notification: No changes

Division exercises: Oct 24th and 25th, Wexford did their testing with the dispatch center. I provided feedback to Trevor and Travis on how their staff did. Some of the call takers did not get a location, current situation or much of other information from the RED Center caller. They will be working on those issues internally.

MABAS Special Ops group experienced some issues with getting notification from the RED center through the CAD system, again...

Verizon is only allowing 160 characters to come across on the phones. I changed the long zoom link to a shorter link by using tinyurl.com then rearranged the message so the link is up front.

I did some testing and now the CAD is sending hundreds of characters to my Verizon phone.

We are not sure why this is happening. I have added everyone to receive a text message, a text message via email address, and then send the message as an email to you as well. Hopefully one of the 3 notifications will get to you.

MABAS 101: Working on dates and locations for next year.

IL Dispatcher Hands on class: Attempted to sit down with Nicholai today but due to sick calls, I am on the floor.

Deployment Coordinator: No changes

Dispatch Comms Committee: Next meeting is November 9th.

RED Center: no changes, just short staffed like everyone else.

MI, WI, IL RED Center meetings: no changes

Chris
